Height:	5' 3"
Date of birth:	12/10/1955
Gender:	Male

RM-3A STATUS REPORT

PHYSICIAN'S FULL REPORT SUMMARY Referral:

Clinical Context	Comments And Suggestions Of The Risk Analysis
	<p>ANSd: No autonomic dysfunction detected.</p> <p>SudoD: Mild Microcirculation disorder Mildly reduced C-Fiber velocity Moderately decreased sweat gland function</p> <p>EndoD: Mild Endothelial dysfunction has been detected. L-Arginine has been suggested also for improving the Endothelial function.</p> <p>IR: Significant Abnormal result. Lifestyle change is suggested.</p> <p>CMR: Moderate abnormal result. Further lab tests (Fasting BG and OGTT) are suggested</p> <p>SFN: Significant result. Further supplementary exams comprised in Toronto Clinical Neuropathy Score are suggested.</p> <p>CAN: Borderline result. Moderate failure of parasympathetic response. Mild sympathetic over response is detected.</p> <p>PTG CVD: Mild endothelial and ANS dysfunction detected. Cardiometabolic Profile lab tests are suggested.</p>
Observations	

* Off label use. Results have been tested in clinical studies.

The correlations between 2h- OGTT Glucose and Cardiometabolic Risk score (CMRS) were: $r = 0.56$ ($p = 0.003$).

Small fiber neuropathy risk using the sudomotor response score had a sensitivity of 91.4 % and specificity of 79.1% to detect diabetic neuropathy symptoms score ≥ 1 .

PTG CVD is calculated from the PTG Spectral Analysis markers. Comparing group with CAD and control group, spectral Analysis Markers have a sensitivity of 84.6% and specificity of 96.8% to detect CAD. Off label use. Results have been tested in clinical studies.

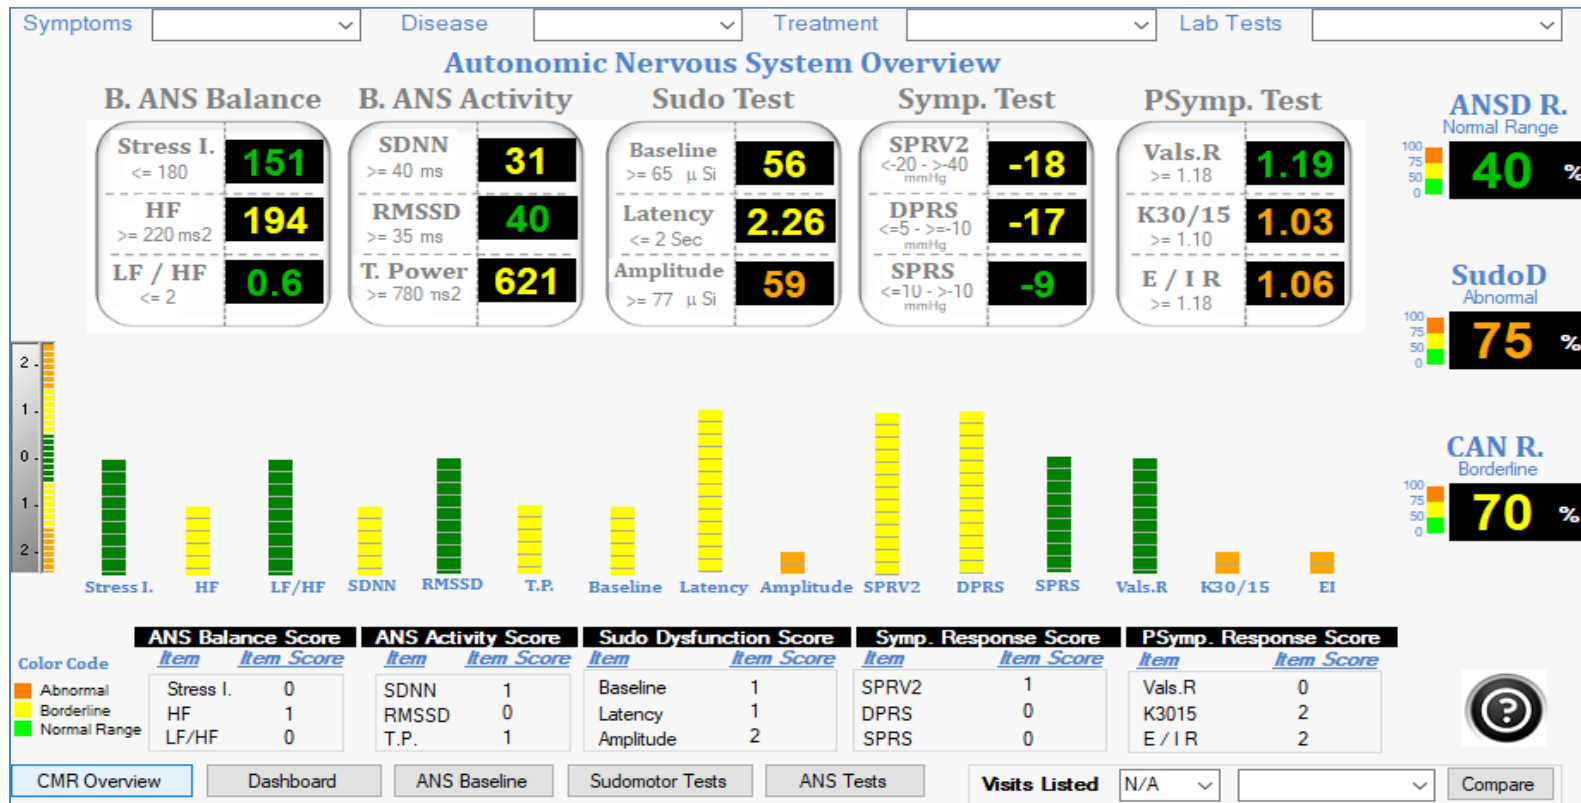

DISCLAIMERS: This report is only for the referring physician and cannot be promoted. The patient profile risk analysis chart and comments and suggestions cannot be used for diagnostic purposes. It is the referring physician's responsibility to make proper judgments based on these numbers and suggestions. All results should be considered within the clinical context of the patient's case history, symptoms, known diagnosis, findings from other diagnostics studies, current medications, treatment plan and therapies.

RM-3A STATUS REPORT

PHYSICIAN'S FULL REPORT SUMMARY Referral:

Risk Factors Chart Meaning:

Systolic = Systolic pressure
 Diastolic = Diastolic pressure
 RI = Marker of medium artery stiffness
 PTGVLFi = Homeostatic Marker*
 PTGTP = Homeostatic Marker*
 STRESS.I = Marker of hepatic glycolysis
 FM = Fat mass
 T. Power = Marker of ANS overall activity
 Baseline = Marker of skin microcirculation
 PTG I = Homeostatic Marker*
 PTG R = Homeostatic Marker*
 CAN S. = Cardiac Autonomic Neuropathy Score
 CMR = Cardiometabolis Risk
 CVD = Cardiovascular Disease

* Homeostatic Marker are correlated to autonomic nervous system and endothelial function
